OBJECTIVE

I am seeking a position within an organization or design firm in User Experience (UX) and/or User Interface Design (UI). i will also convert my UI Design into pixel perfect Responsive HTML5/CSS3 i call there me as PSD2HTML Developer. I would like to work together with software or web design firms, communicating application design principles and strategies for ongoing development.

My aim is to create better interfaces and experiences for the user, making the web, application's and technology easier for the user. Simplifying communication barriers by bridging the gap between end-users, designers and developers.

I am able to work effectively in a team or on my Own. I have demonstrated an ability to lead small Teams and mentor other workers. I pride myself on being able to use my knowledge and initiative to deliver high quality results to tight deadlines. I enjoy a challenge and look for the opportunity to expand and develop my skill set.

Some people call what I do user experience design, some call it web design, some think I am a front end developer, others see me as a UI/UX designer. I see what I do as a combination of all these things and ultimately don't think it really matters which label you like to use.

What does matter is the output of my work, which is always focused at the point where user, business and technical requirements meet and tends to become a perfect product.

I currently reside in Dubai, UAE
